Education

CMR Technical Campus, Hyderabad

2019 – 2023

Bachelor of Technology in Computer Science

CGPA - 8.29(out of 10)

- **Relevant Coursework:** Data Structures and Algorithms (cpp & java), Object-oriented programming, Database management systems, Operating systems, Computer Networks, Problem-solving

Professional Experience

Software Development Engineer - 2 | CarDekho Group (InsuranceDekho)

February 2026 - Present

- **Built Playwright MCP-based automation** for health and motor insurance journeys across quote, proposal, payment, KYC, and issuance flows, reducing manual validation dependency and **reducing manual validation effort and accelerating regression testing for partner-specific releases.**
- **Implemented CSC wallet payment** and transaction reversal workflows with debit, refund, status tracking, and reconciliation support, improving payment traceability and reducing manual investigation effort for transaction mismatches.
- Tech Stack: **Node.js, NestJS, Typescript, Express, MongoDB, MySQL, Kafka, Redis, Docker, AWS**

Software Developer & Engineer - 2 | Smart Interviews

December 2024 - January 2026

- Architected a scalable **AI mock interview platform using LangChain + OpenAI** with conversation-state management, response batching, and prompt caching, **reducing LLM latency by 35% and supporting 5,000+ interviews/month** with zero performance degradation, driving a 30% increase in user engagement.
- **Built a fault-tolerant subscription & payment system** using Razorpay Webhooks with idempotent handlers, distributed locking, and eventual-consistency updates in MongoDB, ensuring highly reliable entitlement state across user services.
- Designed a **real-time proctoring pipeline for 50K+ contest users**, implementing debounced WebSocket streams, TTL-indexed event storage, and low-overhead DOM tracking, reducing backend write amplification by 45% and improving **violation-detection accuracy by 80%.**
- Tech Stack: **Angular, Node.js, Express, MongoDB, Redis, LangChain, Docker, AWS**

Software Developer & Engineer - 1 | Smart Interviews

June 2023 - November 2024

- **Re-architected the leaderboard subsystem** by profiling MongoDB read bottlenecks (1.2k QPS) and offloading ranking operations to Redis Sorted Sets, enabling $O(\log n)$ updates and **reducing p99 latency from 320ms to 40ms, improving system responsiveness by 25–30%.**
- **Built a distributed referral & user-growth pipeline**, implementing async event dispatching and atomic reward assignment, driving 20% user acquisition growth and 15% higher engagement. Additionally, automated Discord monitoring, **reducing manual efforts by 90% for the instructor team**, allowing them to focus on more strategic tasks.
- Developed a **placement portal to automate job listing processes**, portal featured role-based access, real-time notifications, and a user-friendly interface, making it easier for administrators and recruiters to manage listings while ensuring accurate and reliable information.
- Tech Stack: **Angular, Node.js, Express, MongoDB, Redis, Docker, AWS**

Software Developer & Engineer Intern | Smart Interviews

December 2022 - May 2023

Skills

Languages: Java, JavaScript, TypeScript, Python, C/C++, SQL

Backend, Database & Distributed Systems: Node.js, Express, Redis, RabbitMQ, Kafka, MongoDB, MySQL

DevOps / Infra: Docker, AWS, CI/CD, Linux

Core CS Concepts: Data Structures & Algorithms, OOP, System Design, Operating Systems, DBMS

Achievements

- Got **2nd rank** out of 1.8k users in the [NeoCodeathon May Edition](#) all India competition.
- Got **38th rank** out of 4k users in the [Codechef Starters 81 Division 3](#).
- Got **1020th rank** out of 41k users in the [Codeforces Round 1017](#).

Coding Profiles

[Leetcode](#) - knight (max. 1840) [CodeChef](#) - 3 star (max. 1644) [Codeforces](#) - pupil (max. 1262)
